

# GRC Reimagined for the **AI Era** ✨

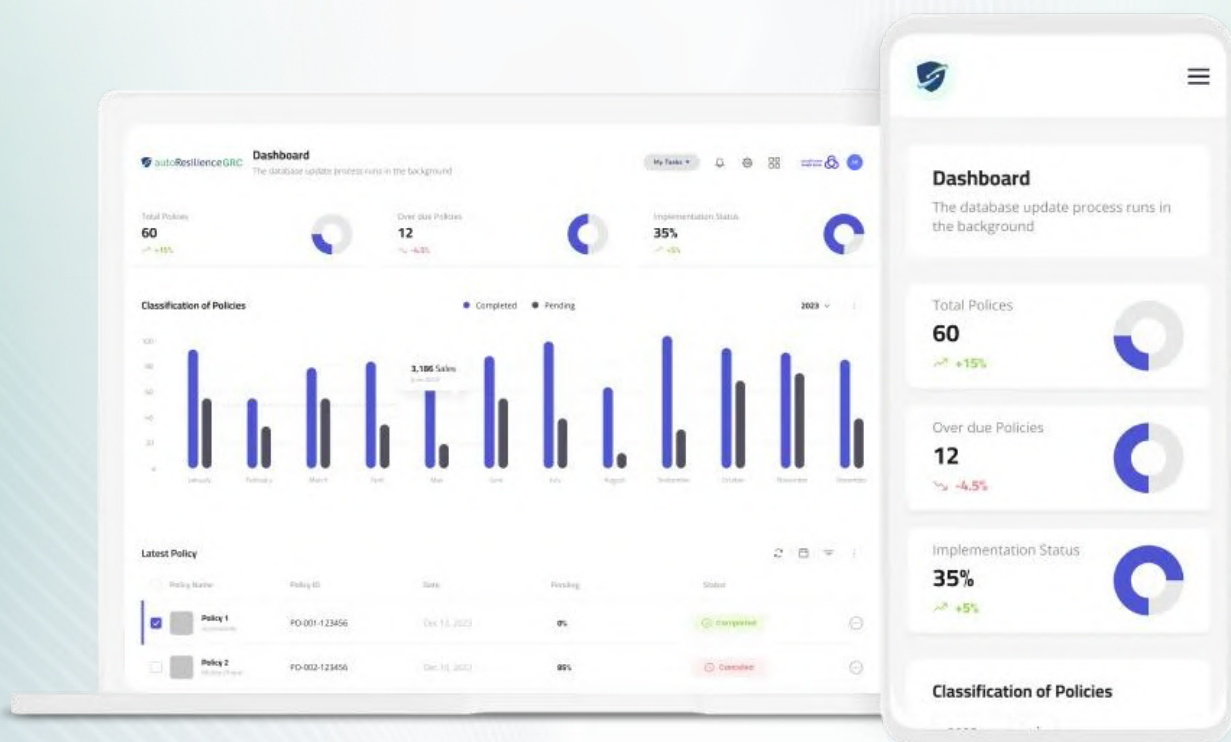

# Resilience Reimagined

In today's hyperconnected, high-stakes environment, resilience isn't a back-office function — it's a frontline business imperative. **autoResilience** is not just another GRC tool. It's an AI-powered command center that unifies governance, risk, continuity, cyber resilience, and compliance into a single, intelligent platform — empowering organizations to adapt, respond, and thrive in the face of uncertainty.

Whether navigating regulatory turbulence, cyber threats, or operational disruptions, autoResilience helps modern enterprises take control — accelerating audit readiness, reducing risk, and enhancing enterprise agility.

“Purpose-built for a world where threats evolve by the hour and decisions must be made in real time.”

# Why autoResilience?

autoResilience was designed for leaders who need more than static dashboards or disconnected systems. It's an **integrated GRC platform** that delivers:

## AI-Native Intelligence

Built entirely around AI for predictive analytics, real-time alerts, and auto-adaptive workflows.

## No-Code, Configurable UX

Launch with 75% prebuilt templates, multilingual interfaces, and drag-and-drop simplicity.

## Global & Local Compliance Out-of-the-Box

Pre-aligned with RBI, SAMA, NESA, HIPAA, DORA, NCEMA, and more.

## Always-On Audit Readiness

Dynamic dashboards, automated testing, and audit-ready control checks.

## Deployment Flexibility

Cloud-native, on-premise ready, or delivered via RaaS fully enterprise ecosystem compatible.

*Ascent's approach brings together domain depth, technical precision, and design simplicity — delivering a platform that works the way modern enterprises operate.*

# Unified Capabilities — Explained with Impact

autoResilience is composed of **10 seamlessly integrated modules** that map directly to ISO 22301 and leading global regulations. Each module works independently — and together — to transform fragmented resilience into a unified strategic capability.

## Modules Include:

1

### Business Continuity Management (BCM)

Define MAO, RTO, and MTPD. Run simulations, issue alerts, and operationalize crisis playbooks. Built for disruption planning and execution.

2

### Enterprise Risk Management (ERM)

Predict, prioritize, & mitigate emerging risks using heatmaps, dashboards, & scenario modeling.

3

### Operational Risk Management (ORM)

Automate mitigation workflows. Configure KRIs and risk thresholds with real-time visibility.

4

### Crisis & Incident Management

Centralize command-&-control with geolocation alerts, emergency communication, & post-crisis analytics. Enable faster coordination & response.

5

### Compliance Management

Auto-map controls to global & local regulatory frameworks. Stay perpetually audit-ready with self-healing control checks & compliance intelligence.

6

### Audit Management

Streamline audit cycles with real-time status tracking, evidence libraries, query-builder-based reporting, & role-based access.

### Cyber Resilience

Orchestrate ITDR responses, simulate vulnerabilities, and gain threat intelligence — all from a unified digital resilience cockpit.

### Third-Party Risk Management (TPRM)

Score, onboard, & monitor vendors using embedded SLAs, KRIs, & compliance mapping. Ensure ecosystem-wide resilience.

7

8

### Policy & Controls Management

Create, version, & enforce policies. Map internal controls to regulatory frameworks & automate testing protocols.

### Information Security Management

Align to ISO 27001. Detect breaches, trigger alerts, & activate response workflows in real time.

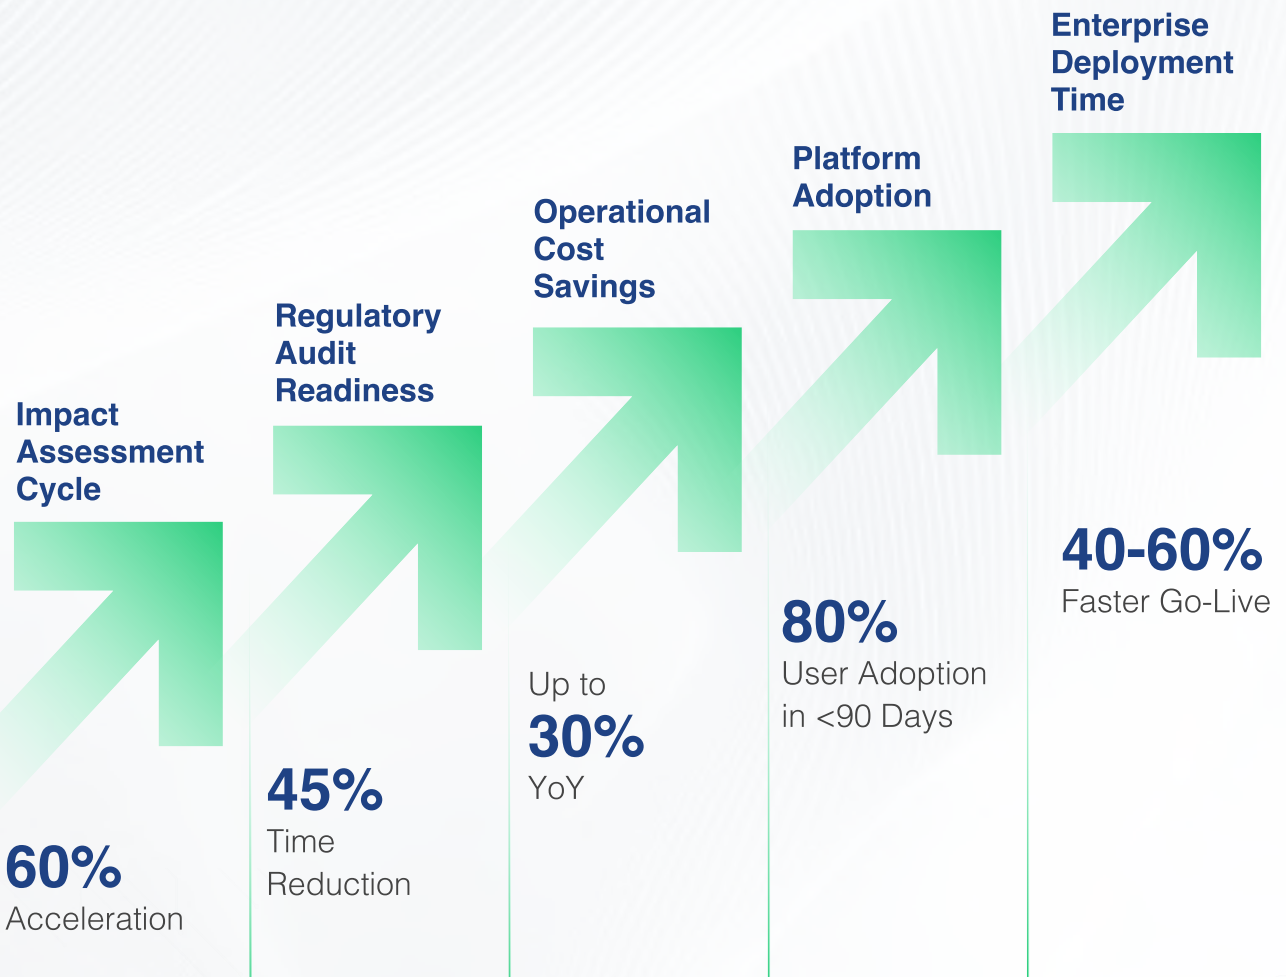

9

10

## Tangible Business Outcomes

Enterprises leveraging **autoResilience experience** measurable performance gains across **risk, compliance, and operational** domains. Whether responding to crises or scaling governance, the platform delivers value at speed.

*A leading regional bank leveraged **autoResilience** to simulate a large-scale cyberattack scenario. The platform enabled **real-time risk modeling and rapid response coordination**, ensuring uninterrupted customer services, regulatory compliance, and minimal financial impact.*

# Built for High-Stakes, Scalable Across Sectors

autoResilience is purpose-built for regulated industries while remaining agile enough to scale across fast-moving sectors.

## BFSI

Supports RBI, SEBI, Basel III, SAMA. Achieve 3x improvement in risk visibility & 60% manual effort reduction.

## Healthcare

Enables HIPAA, ISO 9001, FDA, & HITECH compliance with automation & zero-downtime assurance.

## Public Sector

Arabic-ready with NCEMA and NESI frameworks for region-specific governance.

## Energy & Utilities

Model interdependencies, simulate supply chain scenarios, & fortify grid resilience.

## Retail & E-commerce

Manage distributed risks across vendors, inventory, & logistic.

## Technology & SaaS

Deploy cloud-native governance & ISO-aligned security protocols at scale.

## Manufacturing & Industrial

Ensure compliance with OSHA and ISO 27001 while using AI for predictive maintenance and incident response.

# Why Customers Choose autoResilience

autoResilience is purpose-built for regulated industries while remaining agile enough to scale across fast-moving sectors.

AI-powered from core to edge — not retrofitted

Configurable modules that fit any maturity level

Global-ready compliance frameworks across 5+ regions

Real-time dashboards, alerts, and auto-response engines

Intuitive UI, multi-entity support, mobile-first accessibility

## About Ascent

Ascent Business Technology is a global leader in Enterprise Risk and Resilience solutions. Headquartered in Singapore, we have a strong presence across the Middle East, India, Southeast Asia, and are now expanding into Europe and North America.

With over ten years of experience, we are one of the fastest-growing companies in the risk and resilience space. Our AI and ML-driven software empowers organizations to enhance operations by automating resilience programs and enabling informed decision-making across a wide spectrum of industries.

# Ready to Command the Future of **Resilience?**

In a volatile world, proactive resilience is your competitive advantage. Let autoResilience power your next chapter.
